

# PRODUCT RANGE TRAILERS

Market leading  
innovation,  
Reliable performance,  
Exceptional quality,  
Long term reliability  
Value for investment.

## RDS Solar Trailers

The CBO designed and manufactured range of RDS Solar trailers provide effective and reliable mobile platforms specifically for communications technologies without the traditional compromises on functionality. Fully engineered by CBO encompassing many years of knowledge garnered from

successful in-field deployments in harsh environments supporting challenging applications. Designed for safe, single person operations with market leading levels of functionality and performance.

Suitable for a wide range of applications such as Wifi, CCTV, Microwave, Scada, LTE, UHF/VHF, 4G/5G and digital radio. Australian made and built to last with no compromise on quality or reliability.

The RDS solar trailer range consists of both single and tandem axle, ADR compliant platforms. All of our standard platforms consist of innovative features such as variable angle solar array, adjustable ballasting, fixed position stability legs and a modular integration technique for variable elevation solutions. A range of application specific equipment and battery enclosures are available to offer our clients a market leading level of versatility and customisation without the costs normally associated with bespoke solutions. Our manufacturing and supporting quality assurance process' ensure we can, and will deliver a solution to meet your needs.

## Solar Trailers Range

Description	Power Output* <sup>2</sup> Autonomy	Model Number
Single Panel Solar Trailer	50w - 3 Days	RDS7X5-STL-1P0503
Dual Panel Solar Trailer	100w - 3 Days	RDS8X5-STM-2P1003
Four Panel Solar Trailer	200w - 3 Da	RDS8X5-STM-4P2003
Eight Panel Solar Trailer	400w - 3 Days	RDS14X5-STH-8P4003
